

CPS CEMPlanner

Comprehensive Emergency Management Planner

Simplify Your Planning
Jurisdictional, Regional, State-Wide

Affordable, Standards Based, Collaborative
Emergency Planning Software

Decrease formatting time ▶ **Increase** stakeholder participation & collaboration
Eliminate version control complications ▶ **Automate** plan review and approval

CEMPlanner is a web based software or service that brings planners together and facilitates the planning process to create and maintain standards based plans.

*Planning process based on
FEMA's CPG-101*

**EOP, COOP, Exercise Plans, Pandemic Flu Plans,
Interoperable, Communications Plans and more**

Use CEMPlanner to create your own plans or to support local emergency planning programs.

CEMPlanner's features include:

- ✓ Step-by-step, standards based planning process
- ✓ User Customizable planning templates
- ✓ Plans can be created in HTML or MS Word
- ✓ Unlimited creation of functional annex, incident, event, and site plans
- ✓ More manageable, trackable planning process
- ✓ Stakeholder review, comment and "buy in"
- ✓ Automated version control
- ✓ Automated review and approval workflow
- ✓ Outputs to Microsoft Word and Excel for printing, final formatting, and submission to reviewing agencies

CEMPlanner's planning process is aligned with FEMA's CPG 101

Use CEMPlanner to enhance integrated planning - both vertically and horizontally across organizational and geographic boundaries.

- ✓ CEMPlanner's web-based architecture provides planning teams with collaboration and coordination tools including:
 - ▶ Integrated planning platform with a common set of goals, objectives, and planning standards
 - ▶ Discussion boards and instant messaging
 - ▶ Planning Meeting scheduler
 - ▶ Project and Task management

Use CEMPlanner to support statewide and regional planning efforts.

- ✓ CEMPlanner's heirarchical architecture facilitates multi-level planning and plan review. For example, states can provide counties and other participating agencies with their own copy of CEMPlanner to create plans that "roll up" to the state. This capability enables states to:
 - ▶ Provide statewide or region-wide planning guidance
 - ▶ Facilitate an automated plan review process, including automated discussion and collaboration with county planners
 - ▶ Assimilate a central repository of statewide or regional plans
