

CPS INCIDENT Manager (IM)

Your Online "Command Center"

DOD/Federal, State-Wide, Regional, Jurisdictional

Comprehensive, Standards Based Incident Management Software

Multiagency coordination & communications ▶ **Strategic** Situational Awareness/Common Operating Picture ▶ **Automated** exercise creation ▶ **NIMS/ICS** based operational workflow & reporting

The CPS-**INCIDENT Manager** provides an operational backbone for situational awareness, decision support, and multi-agency coordination.

Safety Act Designated and driven by NIMS/ and ICS, **INCIDENT Manager** takes users beyond status boards and offers the industry's most comprehensive system for managing the entire incident lifecycle from a single integrated solution.

Selected as the US NAVY's Emergency Management Incident Management Software

Operational capabilities based on the Incident Command System (ICS) Workflow

Assess The Situation

- Assimilate and assess information with INCIDENT Manager’s Message center, Live Chat, and Status Boards
- Utilize GIS to view incident locations, details, and to create a common operating picture (COP)

Set up Incident Command

- Identify Incident Facilities such as the EOC, command post, or staging area
- Identify the Incident Command Structure

Create the Incident Action Plan (IAP)

- Identify Incident Objectives (ICS 202), Organizational Assignments (ICS 203/207), Division Assignment List (ICS 204), Communications Plan (ICS 205), Medical Plan (ICS 206), Safety Message/Plan (ICS 208), Hazard Risk Analysis (ICS 215a)

Select Strategy

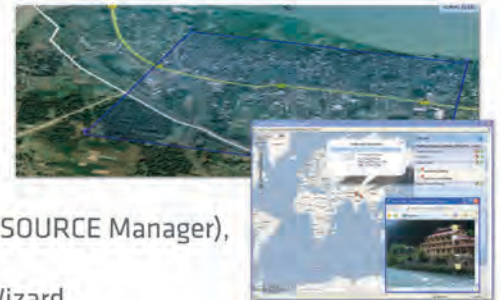

- Strategic GIS - create dynamic geospatial operating pictures of the incident, view interdependent relationships between incidents, available resources, hazards and threats

Take Action

- Activate Notifications, Manage Tasks, Manage Resources (with CPS-RESOURCE Manager), Track Events
- Activate and manage Preplans created with the CPS-Incident Preplan Wizard
- Convert incoming messages into manageable actions based on their applicable message type (resource requests, requests for action, status requests, etc)

Monitor, Track, and Follow Up

- Use INCIDENT Manager’s status boards including the Event Log, Communications Log , Unit Log (ICS 214), Activated SOP/SOG Status , Incident Damage Assessment, Situation Report (ICS 209), Resource Reports (w/ RM Module)

Capabilities - Daily Operational and Support Tools

- Message Center
- Live Chat
- Global Contacts
- Reference Library
- Tasks
- Exercise Module
- GIS Module

Scalable, Flexible Architecture

INCIDENT Manager is a module within the CPS Platform and can operate individually or can seamlessly integrate with any CPS module including CEMPlanner, Tactical Planning Wizard, RESOURCE Manager, GIS, and Exercise.

The system enables users to manage single incidents or multiple incidents simultaneously.
